

QFORM UK

METAL FORMING SIMULATION

SOFTWARE FOR SIMULATION, ANALYSIS AND OPTIMIZATION OF METAL FORMING PROCESSES

Validated by industry worldwide
Integrated with CAD/CAM
Easy-to-use interface
24/7 online support
High performance

Reduce costs
Boost productivity
Increase profitability
Extend your product range
Get more from your equipment

COLD FORGING

Estimation and improvement
of tool life

RING ROLLING

Easy setup of complex
tool movement

SHEET FORMING

Flexible definition of
boundary conditions

Extensive database of forging materials and equipment

OPEN DIE FORGING

Fast simulation with highly accurate results

PROFILE EXTRUSION

Prediction of all flow defects

CLOSED DIE FORGING

HEAT TREATMENT

Set of user-friendly features
for advanced analysis

ROTARY PIERCING

Flexible setup of solving
and remeshing parameters

LONGITUDINAL ROLLING

Application programming
interface (API)
